(54) Abstract Title  
Unscrawable tag

(57) A tag for holding papers together comprises a flexible element eg a cord with a rigid cross-piece at each end. The element has a screw-threaded connection intermediate its ends to enable the device to be separated at the connection.

Description of Easy Tag:

Easy Tag

A versatile stationery tag to be used for holding papers and documents together. Easy Tag is made of a cord with "T" shaped plastic ends and an un-screwable plastic central junction. The device will be made in several lengths (two to six inches long or its equivalent in centimetres). It will permit an individual or a few papers and or documents to be inserted at a specific point in a pile of existing papers with ease. The idea is that the Easy Tag is to be unscrewed with papers lying on either side of the screw so as to enable a single or few papers to be inserted in a particular position amongst other papers with speed and ease.

Claims:

Easy Tag

1. A device to enable individual papers or documents to be removed and or inserted in a particular place amongst other papers and or documents with ease without the need to remove all documents from tag.
2. The device is intended to be a time saving invention making it easy to put into date order documents on a file or removing for example one or two documents amongst many documents without the need to remove all documents from the tag.
3. A cylindrical piece of plastic at each end of the device to make threading of documents possible.
4. A cord between the cylindrical ends and each part of the central plastic screwable junction.
5. A central junction made of plastic which screws and unscrews to enable documents to be inserted between other documents.
